Learning from deaths: a review of the first year of NHS trusts implementing the national guidance
https://www.cqc.org.uk/publications/themed-work/learning-deaths
includes a “case study analysis of three trusts that [were] rated outstanding for well-led between September 2017 and June 2018. This focused specifically on the quality of their processes for learning from deaths and the factors that had supported good practice in learning from deaths.” (p.6 of the CQC Learning from deaths review)

Single Oversight Framework for NHS providers - 5 March 2019 “Minor change to 6 week diagnostic waits metric”
https://improvement.nhs.uk/resources/single-oversight-framework/

Maternal and neonatal health safety collaborative: updated Driver diagram and change package documents and case studies of quality improvement projects delivered by Trusts through their participation in the collaborative

**Driver diagram and change package documents:**
- Increase the proportion of smoke-free pregnancies
- Improve the optimisation and stabilisation of the very preterm infant
- Improve the detection and management of diabetes in pregnancy
- Improve the detection and management of neonatal hypoglycaemia
- Improve the early recognition and management of deterioration of either mother or baby during or soon after birth

**Case studies of quality improvement projects:**
- Improving category 1 caesarean section ‘decision to delivery’ interval [Heart of England NHS Foundation Trust]
- Improving transitional care (TC) and keeping mothers and babies together [East Kent Hospitals University NHS Foundation Trust]
- Increasing reporting of reduced fetal movement [Bradford Teaching Hospitals NHS Foundation Trust]
- Maternal and neonatal health safety collaborative case study [North Tees and Hartlepool NHS Foundation Trust]

**Maternity huddles:**
- Implementing huddles and handovers — a framework for practice in maternity units
- Cross-site maternity safety huddles: delivering world class care at the right time in the right place [Royal Free London NHS Foundation Trust]
https://improvement.nhs.uk/resources/cross-site-maternity-safety-huddles/

Is virtual clinic follow-up of hip and knee joint replacement acceptable to patients and clinicians? A sequential mixed methods evaluation

Using Always Events to derive patient-centred quality improvement priorities in a specialist primary care service providing care to a homeless population

The following post to the ‘Q’ community blog provides an insight into one member’s recent experience publishing his work in BMJ Open Quality.

“What tips would you give to members when publishing work?

The main tip is to do your quality improvement project prospectively applying QI methodology throughout your work from start to finish. It will make your publication so much easier to write up! Do not forget the importance of baseline data, sometimes overlooked or described poorly. It will inform the reader as to why you embarked on your improvement.”

Member Insight: publishing on BMJ Open Quality Blog post by Aklak Choudhury | 19 Dec 2018

Other journal articles

Occasionally, we’ll highlight articles reporting QI studies, methods and audit to drive quality improvement. These articles, most with one or more authors affiliated to a UK/NHS organisation, have been published recently in journals which are not featured regularly in this bulletin. Please contact the Library for help with accessing the full-text of the articles or to request a literature search in your specialism.

From ‘Q’ (The Health Foundation & NHS Improvement)

When issue 4 of the QI Bulletin was compiled in September 2018, ‘Q: the journey so far’ had just been published, three years after the Q community started. Now, we revisit Q and highlight some recent blog posts.
