Here are some tips to get the best out of Google Scholar:

- Use as many relevant keywords as possible when searching.
- If you have a phrase "put it in quotation marks"
- Use a minus sign before a word to exclude it from the search.
- On campus you will have links to 'Find it at Oxford', off campus you can activate these by searching for Oxford on the Library Links option in Scholar Preferences.
- If you use Endnote or Refworks you can set these as your bibliographic manager preference in Scholar Preferences.
