Searching SOLO for titles by topic

The search function in SOLO searches within the full record for a title, so even if you don’t know the title of a book, you can type in keywords for a particular topic, and you will find books that cover the subject you are interested in, even if these words are not in the title.

For example, searching for ‘dickens’ and ‘education’, and limiting the results to items held by English Faculty Library, provides a list of 18 titles which may be relevant to this topic, including ‘Our Victorian education’ which lists Dickens in the table of contents within the record.
