Benefits of adding thesis to ORA

**Citations**: increased visibility is likely to lead to increased citations of your work

**Persistent links**: the links/URLs to items in ORA will stay permanently live to avoid the problems of broken or dead links.

**Impact and use**: Increased visibility and easier access should result in increased impact and use of your research

**Visibility of your research is increased**: ORA is heavily crawled by Google and other search engines.

**Preservation**: ORA provides the means to preserve your research for the long-term.

When & What to deposit

Submit your thesis to ORA once you have been granted leave to supplicate.

The version of your work that is required for deposit to the research archive in order to comply with the terms of your graduation is a copy that is as close to the examined work as possible, with all images and text in place.

A PDF version of the work (which may be identical) should also be added to the archive as the version for dissemination.
http://ora.ox.ac.uk

Select Deposit from the ORA homepage.
http://ora.ox.ac.uk/information/contribute

Select the thesis deposit form.

If your Oxford login has expired contact the ORA team.
Use your Oxford Single sign-on to login into the deposit form or the login details provided for alumni access.
Select “Choose File” and select a file from your computer. Multiple files can be uploaded here, including Zipped folders. You must select “Start upload” to upload the file.

Box must be ‘ticked’ in order to upload a file.

When uploaded the file will appear here. You can select to delete the file if an error has been made.

Select to continue.
Select appropriate subjects and add keywords.

Select to continue
*If you are leaving the University shortly or your Oxford ID is about to expire please add a personal email address where we may contact you (hotmail/gmail/yahoo etc.)*

**Add your details and a sustainable email address.**

Select the ‘Author’ and ‘Copyright holder’ roles from the options (using the Ctrl key)

Select the [+ ] icon to add another creator to the record, this will allow you to add your supervisor details. Select the ‘Supervisor’ role.

Select to continue
4. Related publications

Related publications and datasets

1. Title of related item
   - Related journal publication
2. Type of relationship
   - My thesis is a part of this related item
3. Abstract or brief description of related item
   - Journal article produced from chapter two of my mock thesis
4. DOI or URL of related item
   - 10.1045450-2
5. Citation of related item (If no URL or DOI)

Add related item

Select to continue to Step 5 - Funders, rights and licences
Indicate whether you are in receipt of a funding award and complete details of that funding body – this will aid with successfully acknowledging your funder for their support, which is often a requirement of the funding.

Enter the year printed on your thesis.

Select to continue.
6. Making your thesis available

* Have you applied for dispensation from consultation?
  - Yes
  - No

* Does your thesis contain any third party work?
  - Yes
  - No

Access conditions for files

- Content
- Description of file
- Can this file be made freely available?
  - Yes
  - No
  - After a certain period

What is the embargo date?
- Embargo end date
- Embargo period
  - Years
  - Months
  - Starting from
  - Today
  - Publication date
  - Data

Embargo release method
- Select release method

Reason for Embargo
- Commercial confidentiality
- Publication pending
- Conditional access only
- Copyright or other intellectual property restrictions
- Ethical conditions or agreements
- Legal conditions or agreements
- National security issues
- Patent pending
The publications or datasets you have previously submitted to ORA are listed below. From this page you can complete unfinished ORA contributions that you previously saved for later, or start to deposit a new publication or dataset.

This is a beta version, and we would welcome your feedback or questions so we can improve the service in our next stage of development work.

Open Access Thesis - Impact

Social Sciences D.Phil. thesis (2010) 211 views 89 downloads

MPLS D.Phil. thesis (2011) 2341 views 785 downloads

A D.Phil. Thesis (Medical Sciences), written in 2013 – 1583 views, 420 downloads

A D.Phil. Thesis (Humanities), written in 1975 – 7873 views, 4005 downloads
“...a full text should be available within a maximum of 12 months following award.”
Generally the author holds the copyright for their thesis. A thesis may often include material (e.g. images, graphs, photos, etc.) for which copyright may be held elsewhere. This material is known as ‘third party’ copyright.

Permission should be obtained from the copyright holders for third party material before it can be made available in ORA.

Material where permission cannot be obtained should be removed from the dissemination copy of the thesis and dispensation from consultation should be applied for (if deposit is mandatory).

From published work: ‘fair dealing’ may apply (quotations, short excerpts), otherwise permission from the copyright holder is required (maps, photos, cartoons, etc.).

From unpublished work (other thesis, research groups): permission must be obtained from the copyright holder.

From your own publications: check publisher policy.
Links to permissions request forms are usually available with the publisher article record page.

RightsLink is used by Elsevier, Sciencedirect, Springer, Taylor & Francis, Nature Publishing Group, AIP, ACS Science and more.

A user ID and login will need to be created for RightsLink (no charge associated)

In most cases reuse requests will be free of charge (note: a licence will still need to be obtained)

Complete details as accurately as possible (both print and online can be selected for thesis reuse)
Other considerations

Material Already Published

Sensitive or Confidential Material
Dispensation from consultation
(Permission to restrict access to your thesis or thesis content)

Apply if:

- a) your thesis contains third-party copyright material that you don't have permission to make available online via ORA
- b) your thesis contains confidential or sensitive material (e.g. patient data, animal research)
- c) making your thesis freely available may invalidate an application for a patent on a product or process described in the thesis
- d) restricting access to your thesis is a requirement of any agreements with an outside body or sponsor
- e) you have another good reason
ORA and Copyright

The Oxford University Research Archive (ORA) serves as the institutional repository for the University of Oxford and is home to the scholarly research output of its members. ORA is also the home of Oxford digital theses.

It is a mandatory requirement for all students following programmes of study, at D.Phil., M.Sc. (by Research) or M.Litt. to deposit your thesis in physical form to the Bodleian Library and electronically to ORA.

Theses from other programmes of study may be eligible for inclusion in ORA on a voluntary basis.

In this task, we will use ORA to find thesis and journal article records. We will then look at how you would obtain copyright permission to make third party copyrighted material included within your thesis available online via ORA.

Imagine that you are writing a thesis on astronomical phenomena. Your supervisor has suggested reading an interesting thesis by a past Oxford student, which may be available on ORA.

- Go to the ORA Homepage
  Available at http://ora.ox.ac.uk/
- Search for ‘Massive Black Hole Remnants’
  The Search Bar is on the top centre of the screen, above ‘Top Downloads’ and ‘Latest Additions to ORA.’
  You can use “inverted commas” to narrow your search. Further searching ORA guidance can be found on the ORA Libguide (http://ox.libguides.com/searching-ORA)
- Find and explore the thesis record
  Click on the title ‘Massive black hole remnants of the first stars and their significance in present-day galactic halos’ to enter the thesis record.
  Inside the ORA Record, you can see the abstract, bibliographic data, a link to download the thesis file and statistics on the number of times the record has been viewed and downloaded.

Reading this thesis has sparked new directions for your research, and you now wish to find an article on high energy cosmic rays, that was written by an Oxford academic and so may be available in ORA.

- Go into the journal article record ‘Cosmogenic photons as a test of ultra-high energy cosmic ray composition’
  \(\text{You can use the search bar from within an ORA Record.}\)

You wish to use a figure from this article in your thesis. Before you can make any third party copyright material (e.g. images, graphs - including those you adapted, large excerpts of text, etc., that have been used in your work from another individual’s work or creation) freely available online you should obtain permission from the copyright holder(s) to distribute their material in this way.

- Go to the Publisher webpage for that article
  In the ORA Record, find the Publisher copy link on the right hand ‘links and downloads’ menu
- Click on ‘Get rights and content’
  On this website, this is in the centre of the screen above the article text.
  This opens Rightslink®, a tool allowing you to gather permissions fast and easily.
  Select ‘reuse in a thesis/dissertation’
  Complete the form and select ‘quick price’
  This will tell you how much permission costs — reuse in a thesis is almost always free.

Once your thesis has been examined and you have received Leave to Supplicate (LTS), you must deposit your own thesis with ORA in order to graduate.

Further information on ORA and depositing your thesis is available at the ORA Libguide:

About ORA

The University of Oxford is committed to the dissemination of its research, and in support of this commitment provides ORA. The Oxford University Research Archive (ORA) was established in 2007 as a permanent and secure online archive of research materials produced by members of the University of Oxford.

ORA provides a single point of public access to electronic copies of peer-reviewed journal articles, conference proceedings by Oxford authors and Oxford research theses, created in fulfillment of University of Oxford Awards. This also provides a means for institutional compliance with funders' Open Access requirements.

ORA is maintained by staff within the Bodleian Digital Libraries System and Services Department (BDLSS) of the Bodleian Libraries. Contact details are available here.

There are a number of benefits to storing your thesis in ORA including and of making your thesis freely available:

Benefits for authors
- Makes your research easily available to a wider audience
- Gain wider recognition for your research
- Easy access
- Persistent links
- Easily citable
- Long term preservation

Benefits for the University and wider society
- Previously difficult to find and access research is easy to obtain
- Brings Oxford research to the attention of a wider audience
- Keeps Oxford in line with mainstream delivery of theses online from other universities
- Benefits those who previously might not have had access to Oxford theses

Do you want to know more about depositing your work or searching the Oxford University Research and Data Archives (ORA)?
This term we will be holding regular drop-in surgeries in the Weston Library’s Centre for Digital Scholarship.

Who is this session for?
Open to any member of the University

Venue: Centre for Digital Scholarship, Weston Library
No need to book —just come along!
