Accessing resources via OpenAthens – Eduserv platform

http://www.openathens.net/

Select ‘Login to MyAthens’

Login with your OpenAthens username and password
Select from ‘All Resources’ the resource/platform you want to use, for example the ‘Very short introductions’. If you want to see what you can access within that package/platform, click on ‘Browse by subject’.
Then click ‘Browse all’

You can see all the available books or chapters, and select the one you need.
If you want to see whether you can access a **specific journal title**, select ‘NICE Evidence Journals and Databases’ from ‘All Resources’ and then select ‘A-Z list of available journals’ under the ‘Journals’ heading.

When you get the search box, make sure that you are logged in, which you can check in the upper right corner, otherwise you will not get results from the local subscriptions.
