Journal Metrics – Journal Impact Factor and CiteScore

1. Open SOLO (solo.bodleian.ox.ac.uk) and search for *Journal Citation Reports* (JCR). Click View Online under its entry. Select either browse by journal or browse by category.

2. Untick the SSCI Category.

3. Select Categories. Browse the list.

5. Click Enter subject areas and browse.

What conclusion do you make?

6. Search European *Journal of Nutrition* in Journal Citation Reports. Enter in Select Journal.

7. Repeat the search in CiteScore. Change the sort by to title.

8. Compare the results. Look for:
   - The category (ies) in which the title is listed.
   - Number of journal in this category.
   - Journal profile: number of issues per year
   - What has been included in the calculation
   - Contributions by regions and organisations

Article Metrics – Citation Counts and Altmetrics

9. Open SOLO (solo.bodleian.ox.ac.uk) and search for Web of Science database. Click View Online.

10. Search for:
    Diabetes UK evidence-based nutrition guidelines for the prevention and management of diabetes

11. Look up citation counts: number, usage count, citing article titles and their authors.

12. Repeat the search in Scopus. Look up citation counts [citation counts, and the additional metrics measuring attention in social media, and within the discipline.]

13. Repeat the search in Dimensions at https://app.dimensions.ai/discover/publication. Look for similar data.

What do you conclude?
Author Metric – h-index

14. Run an author search in Web of Science for Peter Higgs, the physicist who received the Nobel Prize in Physics in 2013.
15. Run the same author search in Scopus.
16. Run an author search in Web of Science for Maike Glitsch, Associate Professor of Biomedical Science based in the University of Oxford.
17. Run the same author search in Scopus.
18. Run an author search in Web of Science for William Stockdale, Research Assistant in Fish Heart Regeneration, based in the University of Oxford.
19. Run the same author search in Scopus.
