
"Workforce challenges ... Our report Opening the door* to change also highlighted how competing demands and pressures on staff can compromise the safety of services. We heard how staff had limited time and space to engage in quality improvement initiatives or to attend relevant training." (Full report p.55)

OCTOBER 2019 Vol.28(10)

ORIGINAL RESEARCH

- Patient activation intervention to facilitate participation in recovery after total knee replacement (MIME): a cluster randomised cross-over trial
- Robot for health data acquisition among older adults: a pilot randomised controlled cross-over trial
- Standardising hospitalist practice in sepsis and COPD care
- Major reductions in unnecessary aspartate aminotransferase and blood urea nitrogen tests with a quality improvement initiative
- Assessing the quality of health care in the management of bronchiolitis in Australian children: a population-based sample survey
- Management of low back pain in Australian emergency departments
- Stepped-wedge randomised trial to evaluate population health intervention designed to increase appropriate anticoagulation in patients with atrial fibrillation

**VIEWPOINT**
- Patient experience surveys: reflections on rating a sacred trust

**QUALITY IMPROVEMENT REPORTS**
- Altering standard admission order sets to promote clinical laboratory stewardship: a cohort quality improvement study
- MRI for patients with cardiac implantable electronic devices: simplifying complexity with a ‘one-stop’ service model

**BMJ Open Quality**

Full-text articles freely available.

**LATEST CONTENT – October 2019**

**ORIGINAL RESEARCH**
- Nutritional services for children in Beira, Mozambique: a study reporting on participatory use of data to generate quality improvement recommendations
- Prevention of respiratory outbreaks in the rehabilitation setting
- Snapshot of current carotid artery stenting practice and accreditation in the USA
- Video intervention to improve incident reporting among medical trainees

**NARRATIVE REVIEW**
- Quality planning for impactful improvement: a mixed methods review

**QUALITY IMPROVEMENT REPORT**
- Demand and capacity in an ADHD team: reducing the wait times for an ADHD assessment to 12 weeks
- Reducing waste: a guidelines-based approach to reducing inappropriate vitamin D and TSH testing in the inpatient rehabilitation setting
- Reducing delay in laboratory reports for outpatients from 16% to <3% at a non-profit hospital in New Delhi, India
- Patients at the centre of care: debriefing patients after caesarean section
- Improving the patient experience through a comprehensive performance framework to evaluate excellence in person-centred care
- Optimisation of diagnosis and treatment of heart failure in a primary care setting
- Postpartum depression screening: are we doing a competent job?
- Offering patients a choice for colorectal cancer screening: a quality improvement pilot study in a quality circle of primary care physicians

Selected articles from the October 2019 Issue vol.6(3)

**Update from RCP Quality Improvement: Bringing together the experts to improve services**
Future Health J October 2019, DOI: https://doi.org/10.7861/fhj.QI-6-3
[https://www.rcpjournals.org/content/futurehosp/6/3/154](https://www.rcpjournals.org/content/futurehosp/6/3/154)
In a previous issue (No.14, August 2019) we included a Spotlight on ‘Using patient involvement and experience for quality improvement’. This Update from RCP Quality Improvement in the latest issue of Future Healthcare Journal also looked at involving patients in improvement teams; signposting the Pont of Care Foundation’s Experience-based co-design toolkit1 and the RCP’s publication Working with lay representatives and patient involvement in RCP committees, boards and projects2. The IHI blog post Putting Always Events at the Center of Patient-Centered Care (October 3, 2019) talks about Always Events® 3 as a quality improvement methodology which asks people who use services, their families, and care providers what matters to them.

Pursuing the Triple Aim Takes More Than High-Quality Care
Blog post by Chesley Rappleye | October 22, 2019

This blog post describes East London NHS Foundation Trust's (ELFT) use of the Triple Aim framework* to drive improvement at local, service and system levels following “The Big Conversation”, a series of discussions with staff, patients and other stakeholders “to define the future of the organization”.

* [http://www.ihi.org/Topics/TripleAim/Pages/default.aspx](http://www.ihi.org/Topics/TripleAim/Pages/default.aspx)

Putting Always Events at the Center of Patient-Centered Care
Blog post by IHI Multimedia Team | October 3, 2019
(Edited interview with Helen Lee, Experience of Care Professional Lead, and David McNally, Head of Experience of Care, explaining why Always Events has spread to 135 organizations throughout NHS England)

Always Events® is “a quality improvement methodology which turns our traditional approach to QI on its head. Rather than health care organizations determining what we think will make the biggest difference for patients, you start with a blank piece of paper and ask people who use [your] services, their families, and [care providers] what matters to them. [Helen Lee] … It’s an improvement methodology based on the Model for Improvement. We use PDSA cycles, we use measurement. All of that is in there, but it has that fundamental difference that it starts from that conversation with a group of people who use the services. [David McNally]”
